My first concern about the project is pollution,
because people's health matters.
I'm concerned about the water.

The plaza/ramp connecting the I-90.
I'm also concerned about children and seniors.
Is the proposed project going to affect children
and others being able to access Centennial Pool?

This project's main concern should be about
people, not about money or revenue.

I used to live on Niagara Street, next to Front Park,
and one day I found out that I only have 1 lung,
and that came about from all the pollution
that I have around me. And now that I moved,
trying to get away from those trucks, they are
telling me that traffic will be impacting
the I-90 - close to where I live now.

The project managers, as well as Gov. Lomon seem to be only concerned with money, and when he says he's concerned about people I feel like he's a liar - because they've gone ahead with this project without considering the residents.

School 3 is also not being considered and their access to Front Park being cut off by trucks as well as a possible increase in pollution.

The demolition of the homes on Rusti Avenue were improperly done, and now the residents only have dirt "covering" them from pollution. Instead of dirt there should be green bushes, or a garden, to block pollution.

We deserve our neighborhood to be beautiful.

I am also concerned about the Peace Bridge Plaza. After removing Barked Drive, Front Park would be very useful to residents because of the pollution.

A traffic circle seems like it will only increase the amount of traffic, causing more pollution.

Is the project concerned about residents around Front Park that has a large senior and children population? A population that has a lot of asthma.

I don't believe the project manager has done it's homework. This project needs more time. The people pushing this project are not thinking about the residents, just money.

Sincerely yours
Mona Ann Marting
